Our recruitment team would like to get to know you!

You are looking for a new job challenge? And you would like to work in the exciting space sector? Don't hesitate to contact our recruiters! They will give advice and support you to find the job of your dreams.

We recently had some changes in our recruitment team and we are pleased to introduce our new recruiters Schirin Schimansky (3rd from the left) and Leandros Fonteinias (in the middle). Micheline Bélisle has left the recruitment team and is now the HR Coordinator for our German branch, where she puts her extensive HR experience to good use.

For all of them the best part of their work is connecting with people like you from all over the world. Their passion is to support you to land the job of your dreams and help you grow professionally.

What working for HE Space means

Working for HE Space means being part of a family.

We asked our colleagues: "what makes HE Space unique in your eyes?" The most popular answers were: team spirit, care for the employees, proactiveness, innovation and internationality.

Our colleagues are loyal and stay with the company for years. We are proud of having so many long-service anniversaries to celebrate. Though many of our employees get a permanent contract from our customers and they go with our blessing.

For job seekers as well as for customers such as ESA, EUMETSAT, OHB and AIRBUS, we are a partner in excellence because we offer stability, reliability and the highest quality in staff support.

Astronautin – The First Female German Astronaut

On 19 April the secret was disclosed. We are proud to announce the two trainees who will begin their training to become the First Female German Astronaut. Nicola Baumann and Insa Thiele-Eich were selected ahead of over 400 candidates. They made it through the whole year-long selection process, including interviews, medical and psychological examinations and they convinced a committee of experts.

Nicola (right) and Insa (left) will start their training in July this year, so that one of them can fly to the ISS in 2020.

In sending the First Female German Astronaut to the ISS we will write history. And you get the chance to be a part of it by supporting the financing of the first training phase! Simply go to www.startnext.com/en/dieastronautin, make a donation and choose your reward. We would also really like to encourage you to spread the word and share the link! Current information about Die Astronautin can be found on www.facebook.com/DieAstronautin/.

SpaceBoard - Uniting the space community

We would like to introduce you to a new initiative in the space sector. SpaceBoard is building a professional network dedicated to the field of space. SpaceBoard's mission is to unite the space community within a powerful online platform to encourage interactions between all space industry players and foster academic, professional and business opportunities. The interactive platform is specifically designed to allow for focussed interactions, facilitating the exchange of knowledge among the various players in industry and academia.
