

FOR IMMEDIATE RELEASE - Press Release

Noordwijk, 7 September 2018

Change of CEO

Today, HE Space, Europe's leading specialist in human resource services for the space sector will say goodbye to CEO Claudia Kessler.

Ms. Kessler joined the company in 2004 and started the first German office in Bremen. In 2008 she was appointed CEO of the HE Space Group. She successfully built up HE Space to become one of the most significant suppliers of engineering services to the space industry. Now she will be leaving HE Space by mutual agreement to concentrate on other opportunities.

Scott Millican, founder and owner of HE Space, thanks her for the successful cooperation and wishes her all the best for her future.

In her parting words, Claudia Kessler says: "I always worked with passion for HE Space and I loved to see it grow. I am sure that the company has a bright future and will continue its positive development."

Over the next few months, Scott Millican will take over the role of CEO until a replacement has been appointed. The HE Space Group will continue operations as normal.

About HE Space

HE Space, a thriving privately owned company, operating internationally, with offices in the Netherlands (Noordwijk), Germany (Bremen & Darmstadt) and the USA (Houston), brings together more than 200 professionals from Europe and beyond (29 nationalities).

The focus of HE Space is exclusively on space and space-related activities. HE Space has developed a strong brand in the worldwide space community and offers a mix of customised services to match our customers' needs and working models. The Company focuses on finding the best and the brightest personnel and supporting them to deliver excellence.

HE Space provides expert engineering, scientific, management and administration support to the main ESA establishments, to EUMETSAT and to European space industry including Airbus Defence & Space, ArianeGroup, OHB Systems, DLR GfR, Thales Alenia Space, STI Space Tech and Mynaric. HE Space personnel have made significant contributions to many of Europe's most exciting space projects. HE Space is ISO 9001 certified.
