

HE Space is a successful international space company. For nearly 40 years, we have been supporting our customers with qualified experts in the field of engineering, science and administration. We are currently looking for a Space Systems Project Manager to support our customer in France (Toulouse).

Space Systems Project Manager

Key Tasks and Responsibilities

As part of a NewSpace French startup company , you will have the following responsibilities:

- Project manager for the design, development, test, and production phases of a fleet of low Earth orbit satellites.
- Responsible for supervising the manufacturing of the fleet of low Earth orbit satellites to be on time and within budget.
- Works in collaboration with the prime contractor.
- Identifies implementation issues and proactively develops recovery plans before schedule and cost impacts are realized.
- Reports project status, issues, and problems to senior leadership.
- Manages relationships with a broad set of engineering and production to deliver on project goals.
- Develops and maintains professional working relationships with all project stakeholders across the company

Skills & Experience

You will have the following qualifications and relevant experience:

- 10+ years of demonstrated space system project management experience across multiple spacecraft flight projects/programs;
- Demonstrated ability to identify and address problems using a proactive, systematic approach;
- Fluency in English and in French are mandatory; knowledge of another European language is an advantage.

This job is located in Toulouse. We welcome applicants who are available as soon as possible.
