

**HE Space** is a successful international space company. For nearly 40 years, we have been supporting our customers with qualified experts in the field of engineering, science and administration. We are currently looking for a IT Engineer to support our customer in Germany.

## IT Engineer

### Key Tasks and Responsibilities

You will have the following responsibilities:

- Ability to identify the activities of the development life cycle that are necessary to develop a system/product and provide the level of confidence which is consistent with regulation and program requirements;
- Define checkpoints and reviews with associated maturity expectation aligned with program phases and gates;
- Provide sufficient detailed data and information about system elements to enable the implementation consistent with architectural entities as defined in models and views of the system architecture and in accordance with the allocated requirements.

### Skills & Experience

You will have the following qualifications and relevant experience:

- Bachelor's degree in informatics;
- Passionate about developing advanced software solution for embedded systems and networking protocols - Have experience with Object Oriented analysis and Design;
- Have knowledge about containerization (Docker, ...), orchestration (e.g. K8s) and cloudnative services;
- Excellent problem solving;
- Team player with excellent communication skills;
- Service and customer orientated person with high sense of responsibility;
- High level of assertiveness;
- Ready for an international mobility when required;
- Fluency in English is mandatory; knowledge of another European language is an advantage.

This job is located in Immenstaad, Germany. We welcome applicants who are available as soon as possible.
