

HE Space is a successful international space company. For 40 years, we have been supporting our customers with qualified experts in the field of engineering, science and administration. HE Space has joined forces with CS Group to lead the engineering and digital space market in Europe and to provide highly skilled consulting.

Ground and Space Segment Operations Engineer

Key Tasks and Responsibilities

As a member of a team providing services to EUSPA you will be providing support and you will have the following responsibilities:

- Define the approach to operational validation of major system/SW releases for both ground and space segment and support the EUSPA for managing the integration of new services within the operational baseline;
- Follow-up operational validation of major system/SW releases for both ground and space segment and support the EUSPA for managing the integration of new services within the operational baseline;
- Define and analyse the relevant Operations KPIs;
- Analyse the operations changes: baseline configuration changes or deviations, operation processes evolutions and services provision transitions;
- Define criticality/urgency for observation reports analyses, resolution, setting adequate operational work-arounds, priorities and ensuring and monitoring the timely management by operator and/or industry of observation reports and system anomalies resolution plans;
- Participate to the operations Observation Reports Review Board;
- Follow-up and contribute to operations related to the Service Provision.

Skills & Experience

You will have the following qualifications and relevant experience:

- Bachelor's in aerospace engineering or a relevant discipline;
- Minimum 2 years of experience in ground segment operations;
- Customer focus mentality;
- Fluency in English is mandatory; knowledge of another European language is an advantage.
