Exploitation for Service Transition Engineer

Key Tasks and Responsibilities

As a member of a team providing services to EUSPA, you will be providing support for operational departments in the preparation and execution of service transitions for Union Space Programme components in line with EUSPA Service Management Framework. This includes activities for new infrastructure releases, new missions and service evolutions and improvements. The domain of expertise encompasses, but is not limited to, Galileo (PRS, Security Monitoring, Cyber and Crisis management), EGNOS, COPERNICUS, SSA, GOVSATCOM, IRIS² and future Union Space Programme components. You will have the following responsibilities:

- Support Mission definition, Mission consolidation, Service concept preparation, Service design, Service consolidation and service validation activities, and their associated reviews programmatic reviews (MRR, OVR, SCR, SVRR, SVR, TRR, TRB, PTR etc.);
- Support the conception, preparation, coordination and execution of infrastructure Migration and service migration activities including Plan preparation, Migration rehearsals other elements;
- Support the conception, preparation, coordination and execution of Service Validation campaigns including Plan preparation, preparation and presentation of reports, organisation of reviews, amongst other elements.

Skills & Experience

You will have the following qualifications and relevant experience:

- Bachelor's in aerospace engineering or a relevant discipline.
- Minimum 2 years of experience in ground segment operations.
- Customer focus mentality;
- Fluency in English is mandatory; knowledge of another European language is an advantage.

This job is located in Prague, Czech Republic.
