## Configuration Management for Ground Segment

### Key Tasks and Responsibilities

As part of the Airbus team, you will have the following responsibilities:

- Ensuring a coherent product configuration (requirements, development, production) throughout the entire life cycle of the product through the creation and implementation of KM and SW-KM rules and processes.
- The activity includes the handling of national and international projects on the ground Support Systems & Services program area as configuration manager in close cooperation with the project teams.
- Consolidated and coherent product information and delivery and compatibility
- Requirement, development, production throughout the entire life cycle of the product frozen baselines and status reports.
- Creation and implementation of the configuration management (KM) plan and the operation of the PLM tools for product configuration and validation of suppliers and partners' KM plans.
- Planning, controlling and implementing KM and SW-KM activities for national and international project activities.
- Definition and definition of KM interfaces (internal and external).
- Ensuring the collection, publication, storage and access to product & Project data, drawing sets, documents and software data.
- Internal and external control of changes to product information and implementation of release boards and change control boards.
- Providing coherent product information via baselines (K status) and KM reports (to-build/asbuilt).
- Conducting configuration management audits, checking design compliance and the characteristics of the manufactured product with the contractual and regulatory requirements.
- Conduct metrics analysis and provide results and critical trends;

### Skills & Experience

You will have the following qualifications and relevant experience:

- Bachelor's degree in computer science, aerospace or industrial engineering,
- Several years of experience (at least 3 years) in configuration management (KM) and SW-KM;
- SAP at least knowledge of detailed functions

## Passionate about people and passionate about space

- Knowledge of SAP PLM/Windchill PLM is an advantage
- Fluency in English is mandatory; knowledge of German will be an advantage.
