

**HE Space** is a successful international space company. For over 35 years, we specialize in personnel recruitment with an exclusive focus on the Space sector, supporting our customers with qualified experts in the field of mainly engineering and science. We are currently looking for an Laboratory Technician to support our customer in the Netherlands.

## Laboratory Technician

### Key Tasks and Responsibilities

Working for the Directorate of Technical and Quality Management (D/TEC) at ESA/ESTEC within the Optics and Opto-Electronics laboratory, you will have the following responsibilities:

- General maintenance and servicing of optical, electro-optical and electronics equipment and infrastructure;
- Maintain the inventory, maintenance & calibration database;
- Execute weekly and monthly laboratory checklists;
- Assistance with the administration of the laboratory ISO 17025 accreditation documentation system, record keeping and audit preparation;
- Handling the electrical safety inspections (NEN3140);
- Handling the routine ordering of laboratory materials;
- Implementation and maintenance of applicable safety rules and regulations;

### Skills & Experience

You will have the following qualifications and relevant experience:

- At least 2 years' experience in laboratory maintenance and administration;
- Experience with working in an ISO17025 accredited laboratory is an asset;
- Experience with electrical safety (NEN3140) requirements, preferably authorized to perform NEN3140 inspections;
- Fluency in English is mandatory; knowledge of the Dutch language would be an asset.

This job is located in Noordwijk.
