

HE Space is a successful international space company. For 40 years, we have been supporting our customers with qualified experts in the field of engineering, science and administration. We are currently looking for a Science Communication Editor to support our customer in the Netherlands.

Science Communication Editor (temp)

Key Tasks and Responsibilities

You will have the following responsibilities:

- To contribute to the definition of the content, and to support the editing of the material for the media presence of ESA's Science and Exploration activities;
- To liaise, under the responsibility of the Science Division, with the scientists of the Science and Exploration missions in the production of content;
- To liaise, under the responsibility of the Science Communication Officer, with the graphical and multimedia production team in the production of visual material;
- To coordinate a pool of freelance editors;
- To conceive and conduct social media campaigns;
- To maintain regular contacts with media, including social media;
- To organize media events, including briefing of speakers and follow-up of requests from media;
- To perform analyses of developing media trends and local impact reporting;
- To set-up outreach events in the ESA communication plan;
- To support launch and mission events.

Skills & Experience

You will have the following qualifications and relevant experience:

- Science PhD or Masters in Science, further qualification in Journalism or Communication would be an asset;
- 3-6 months temporary project;
- At least four years of work experience in science, engineering or technological communication within International Media and/or Social media;
- A good synthesis ability and a basic understanding and interest for space science;
- Excellent spoken and written English; fluency in French and other European languages is desirable;
- Good interaction skills and capacity to work under stressful situations;
- A fair knowledge in the following areas will be considered an additional advantage: Web applications, Audio-visual requirements, Graphic design and layout
- The contractor(s) shall possess skills to cover and execute the tasks linked to their function including a high-level of flexibility, good organisational and communication skills;
- Working under direct supervision of lead staff but autonomy in execution of tasks assigned is mandatory;
- Fluency in English is mandatory; knowledge of another European language is an advantage.
